

MEDICAL DIAGNOSTIC EQUIPMENT

Wilson-Hurd offers domestic engineering support and the ability to conduct all final assembly overseas. This combination of services was exactly what our customer was looking for in their membrane switch assembly.

The membrane switch featured here was a new design for our customer and one they wanted to get into market quickly. Our customer provided us their drawings and asked us to make improvements to enhance the overall functionality of their switch. Our talented team of engineers worked closely with our customer to develop an improved design within our customers' timeframe.
