

OIL AND GAS EXPLORATION

This PiezoPanel was designed for use in the extreme outdoor environment of an offshore oil rig where harsh weather and salty air are very common.

Project Details

- Size: 6.310" Diameter
- Overlay Material: .007" Embossed Polyester
- Decoration: Five (5) Colors - Second Surface Printed
- Window: .060" Hard Coated Anti-Glare Polycarbonate
- Switching: Five (5) Contacts
- Subpanel: .060" Stainless Steel
- Switch package is laminated to the backside of the .060" polycarbonate window material. The switches are activated through the .060" polycarbonate.

Flow Meter Control Device

- The printed shield on switch package provides protection against electro-static discharge.
- Completely assembled, including three (3) stand-offs, ready-for-installation.
- Interface integrated into electronics and provided by customer.
