

PRINTING PRESS APPLICATION

The Printing Industry demands a control panel that offers a long life and is extremely durable. The piezo technology meets that demand with its stationary switches. An audible buzzer feedback and emergency stop button were also incorporated into this solution that we custom designed for our customer. The switch was designed in order to integrate our customer's LCD display along with twenty (20) sealed LEDs.

Project Details

- Size - 8.5" x 16"
- Overlay Material - .020" anodized aluminum
- Colors/Decoration - blue, orange, and black metalphoto graphics
- Switching - twenty (20) contacts
- Sub Panel - .125" aluminum
- PC Board - .063" FR-4 with interface Components.
